| Data Sheet Type    | Final    |
| Material Reference | 0793     |
| Polymer            | NBR      |
| Date Issued        | 13/05/24 |

## Description

A 60? Shore Butadiene Acrylonitrile Rubber (NBR) or as better known Nitrile Specification Rubber Sheet conforming to BS2751:2001 and for use in industries and/or applications where surety over the compound is required. Designed originally for Aerospace & Defence Industries.

| Specifications  | Values                         | Test Methods            |
|---|--------------------------------|-------------------------|
| Accelerated Ageing - Change in Elongation at Break (168 Hours @ 70°C) | -35 % Change to Original       | BS903 Part A19 Method A |
| Accelerated Ageing - Change in Tensile Strength (168 Hours @ 70°C)    | -10 % Change to Original       | BS903 Part A19 Method A |
| Accelerated Ageing - Change in Hardness (168 Hours @ 70°C)            | +10 ° Shore Change to Original | BS903 Part A19 Method A |
| Compression Set   | 20 % TYPE 2 24H/125C           | ASTM D395 Method B      |
| Elongation at Break   | 400 % Minimum                  | ASTM D412               |
| Highest Recommended Working Temperature                               | 110 °C Maximum                 | None                    |
| Liquid Resistance - Volume Change 24 Hrs @ 40°C                       | -0+25 %                        | BS ISO 1817             |
| Lowest Recommended Working Temperature                                | -25 °C Minimum                 | None                    |
| Shore Hardness(IRHD)  | 60 ° Shore                     | BS903 Part A26 Method N |
| Specific Gravity  | 1.25 g/cm <sup>3</sup>         | ASTM D2240              |
| Tensile Strength  | 8.5 MPA Minimum                | ASTM D412               |

## Purposes

Chemical Resistant

Oil Resistance

---

**Important Notes about this Material Data Sheet**

This datasheet has been carefully compiled to advise you, our customer, in the best possible way. The information, figures, test values, and data correspond to actual engineering standards and are the result of many years of tests and trials. As individual operating conditions influence the application of each product, the information supplied in this datasheet can only be seen as a rough guideline. In every case it is the sole responsibility of the customer to evaluate his individual requirements, in particular whether the specified properties of our products are sufficient for the intended use. This datasheet is subject to alteration without prior notice. All mentioned values contained herein are guiding values representing long-term experience averages. Please be aware that Test Results for individual Material Batches will only be provided if requested at the time of order and may be subject to additional charges and/or lead times. This Data Sheet supersedes all previous data sheets and any other data previously provided either Verbally, Electronic or Written, with reference to the above Material Grade.
