

REACH / Substances of Very High Concern (SVHC) statement

Please be informed that our products do not contain Substances of Very High Concern (SVHC) indicated by ECHA for REACH, above relevant concentration limits (Status Echa Candidate List of 15th January 2019), see also

<https://echa.europa.eu/candidate-list-table>

Although these substances are not intentionally added, this does not exclude the presence of traces due to (among others) impurities in the components supplied by third parties and used in our production facilities. However, based on information from our raw material suppliers we conclude that these traces are less than the Classification & Labelling related threshold values (generally being 1000 ppm).

Regarding the status of CLP (Classification , Labelling and Packaging of chemicals) please be informed that Safety Data Sheets do need to be updated under certain conditions. Those conditions do not apply to MacLellan Rubber (MRL) products. The current versions of the SDSs for MRL products are still valid. Please bear in mind that polymers are exempted from the obligation to register under REACH. For this reason you will also not receive a registration number or eSDS for our polymer products.

Please be informed that Use Description related to REACH is not relevant for MRL products since polymers themselves in general are exempted from the obligation to register with REACH; exposure assessment for making risk characterization and use description is not required.

If you are receiving products of other Companies please contact them for REACH information regarding their products. We would be pleased to help you if you have any further questions.
